

Joselyn Lagunas

AI-Native Software Engineer | Python | AI/ML | Software Systems

Mexico City, Mexico | she.lagunas@gmail.com | github.com/Shel-y | linkedin.com/in/joselyn-lagunas

Summary

Software Engineering student with hands-on experience building **Python applications, AI-powered tools, distributed systems, and cloud solutions**. Experienced with **LLMs, Generative AI, AI agents, APIs, machine learning, data analysis, algorithms, and AWS**. Built real-time data processing systems during an international research internship and developed AI and cloud projects that combine software engineering with applied machine learning. Strong debugging, problem-solving, and ownership mindset with experience leading technical projects and collaborating across international and community environments.

Education

Universidad Virtual del Estado de Guanajuato (UVEG)

Expected 2027

B.S. in Software Development Engineering

Experience

Mirai Innovation Research Institute

Osaka, Japan

Innovation Technology Intern

Mar 2025 – May 2025

- **Built** a real-time EEG data processing pipeline in Python for continuous processing of physiological signals in experimental systems.
- **Developed** socket-based communication between Python and Unity, integrating independent systems and **resolving cross-device communication issues**.
- **Debugged** hardware, networking, and software integration problems independently, adapting the system to changing experimental requirements.

QIntern 2026

Remote

International Mentor & Project Lead – Cloud Algorithm Benchmarking

Jul 2026 – Aug 2026

- **Led** a technical project with 4 interns, designing reproducible experiments to benchmark quantum algorithms using Python and Amazon Braket.
- **Implemented** structured experiment workflows and result logging, enabling consistent comparison of algorithm performance across cloud simulators.

AWS Community Builder

Mexico

Technical Community Contributor

2025 – Present

- **Developed and presented** technical content on AI, AWS, and software technologies at AWS Summit Mexico, AWSome Women Summit LATAM, AWS Community Day, and JSConf Mexico.

AWSpectrum LATAM

Mexico

Founder & Community Lead

2026 – Present

- **Founded and lead** a technology community focused on creating accessible technical learning opportunities through workshops, mentoring, and collaborative projects.

Selected Technical Projects

NeuroCopilot – AI Application

2025 – 2026

Python · LLM APIs · Generative AI · AI Workflows · Gradio

- **Built** a Python-based AI application integrating LLM APIs to process information and support structured AI-assisted workflows.
- **Designed and tested** prompt-driven workflows and a Gradio interface for rapid prototyping, experimentation, and user feedback.

Traffic Rain AI – Cloud, Algorithms & Machine Learning

2026

Python · AWS Braket · S3 · Machine Learning · Graph Algorithms

- **Built** a hybrid optimization system processing public flooding data and combining machine learning, graph algorithms, and Amazon Braket to generate route assignments for affected areas.
- **Implemented** graph-based distance calculations and compared classical and quantum optimization approaches for route assignment.

Technical Skills

Languages: Python, SQL, R

Software Engineering: Data Structures, Algorithms, Object-Oriented Programming, Debugging, Distributed Systems, Socket Programming, Git, GitHub

AI/ML: Machine Learning, LLMs, Generative AI, LLM APIs, Prompt Engineering, AI Agents

Cloud: AWS, Amazon S3, EC2, Lambda, CloudWatch, IAM, Amazon Braket, Boto3

Data & Tools: NumPy, Pandas, Jupyter, Gradio

Recognition

AWS Community Builder – Technical contributions in AWS, AI, and cloud computing

International Mentor & Project Lead, QIntern 2026

Technical Speaker – AWS Summit Mexico, AWSome Women Summit LATAM, AWS Community Day, JSConf Mexico
